

Photo submission Guidelines for Rock Climbing: Minnesota and Wisconsin, 2nd edition

Deadline: June 1, 2011

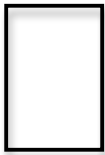

I will be happy to consider your action photos for the next edition. Color printing will allow us to show off the beauty of our crags. Please read the submission guidelines and send me your best shots!

Original photographs must be:

- 35mm transparencies or film negatives, clean and unscratched

OR

- Digital photographs with a minimum horizontal size of 1800 pixels

1800px

1800px

We will need written releases from the photographer and from any identifiable person in the photos.

Please don't send the originals or releases until I ask for them

How to submit photos:

Please submit your low res photos in JPG format, reduced in size to less than 100 Kb.

It will make my life easier if you include your last name in the file name. Please don't submit files named DSC_672898, they are really hard to keep organized. File names such as Farris_shovel_12.jpg are perfect.

If you have color prints, you can send them (but you keep the negatives for now). Write your name and photo ID on the back. Low resolution scans of 35mm slides are fine.

Include a text file with photo names and descriptions (include names of climbers and names of climbs they are on). If you have the info entered in IPTC or XML format in the photos, I can use that. If you don't know about this, just ignore it.

Email your photos and descriptions to guide@mfarris.net

Final decisions on the photos will be made by Falcon. I'll be in contact with you to get your originals when we need them.

You will receive a photo credit on the same page as the photo appears. Sorry, no money.
